

I and several friends are very avid XM subscribers. I feel XM is a totally awesome fantastic service well worth it's cost. Now, it has even got better with the addition of traffic and weather channels that are a great benefit to American citizens who travel around the USA. Perhaps I am going to Chiago. I would not be able to hear weather on local radio stations, but could get weather on XM and follow it as I got closer to my destination. The type of service, variety and quality XM offers is not available on regular radio. They should upgrade the service they offer and forget about trying to shut down their competition. After all, XM is a PAY service. I respectfully urge the FCC to rejedct the NAB's petition 04-160 and support XM radio's ability to continue to provide the excellent service it has done for it's subscribers for several years.
